

# \$7 million in *additional grants.* Every. Single. Year.

**improve  
education**

**create safer  
schools and  
neighborhoods**

**improve  
parks and  
greenways**

**stop hunger**

**provide for  
our most  
vulnerable**

**support arts  
and culture**

## Create transformational change. Forever.

In 2001, researchers at Boston College came up with a concept they called the Transfer of Wealth. Simply put, this is what happens when one generation passes money down to the next generation. In 2012, we studied how the Transfer of Wealth could impact Clark and Floyd counties. We discovered a startling statistic: in the next 50 years, the people of Clark and Floyd counties are expected to pass down \$9.8 billion to the next generation!

But we don't have to wait 50 years. If everyone gave just 5% of their estate to the Community Foundation during the next decade, that would mean \$143 million in estate gifts that would influence change in our community forever.

From this invested principal, we could give away an additional \$7 million every year to the causes you care most about. Can you imagine the impact that \$7 million each year in grants could have on our community? And because we would never have to touch the principal, the impact will be felt throughout our community, forever.

Imagine what an additional \$7 million every year could do. The Transfer of Wealth numbers are staggering. The possibilities are limitless.

If you'd like to help our community in perpetuity, support the causes you care most about, and pass your values on to the next generation, please call us at (812) 948-4662.

## What causes do you love? What future do you see for our community?
